Global Identity

Abiometric digital identity platform that "evolves just as you evolve" is set **to be introduced** (first in West Africa) thanks to a conspiracy / public-private

partnership between the **Bill Gates**-backed **GAVI** vaccine alliance, **Mastercard** and the AI-powered "identity authentication" company, **Trust Stamp**.

Like Sheep and cattle every **human being** will be chipped **ID**. Not on your ear. But injected in your body. Perhaps with a time release "deadly consequence" per a pre 911 leaked paper by **NASA**. (www.News-Expose.org)

Slick Rick (Richard Neil Haythornwaite)... has partnered with over **1,000 organizations** including an umbrella group called **GAVI**.

The Federation is funded through a **membership scheme** through which it represents more than **1000 organisations** drawn from across sectors including advertising and media, animation, architecture, broadcasting, crafts, creative education, creative tech, design, fashion, film, heritage, museums, galleries and libraries, music, performing arts, photography, publishing, video games, visual arts and visual effects.

Members include **FTSE 100 companies, multinationals, privately owned businesses, SMEs, charities and non-profit organisations, trade associations, universities and further education colleges, and individual practitioners.**

Registered For Life The program, which was first launched in late 2018, will see Trust Stamp's digital identity platform integrated into the **GAVI-Mastercard "Wellness Pass,"** a digital vaccination record and identity system that is also linked to Mastercard's click-to-play system that powered by its AI and machine learning technology called **NuData.**

Mastercard, in addition to professing its commitment to promoting "centralized record keeping of childhood immunization" also describes itself as a leader toward a "World Beyond Cash," and its partnership with **GAVI** marks a novel approach towards linking a biometric digital identity system, vaccination records, and a payment system into a single cohesive platform.

The effort, since its launch nearly two years ago, has been funded via \$3.8 million in **GAVI** donor funds in addition to a matched donation of the same amount by the **Bill and**

Melinda Gates Foundation.

GAVI reported that Mastercard's **Wellness Pass** program would be adapted in response to

any pandemics. Did you know many of the "diseases" have patents by the pharmaceutical companies?

Mastercard announced that Trust Stamp's biometric identity platform would be integrated into **Wellness Pass** as Trust Stamp's system is capable of providing biometric identity in areas of the world lacking internet access or cellular connectivity and also does **not require knowledge of an individual's legal name or identity to function.**

The **Wellness Program** involving **GAVI, Mastercard, and Trust Stamp** will soon be launched in **West Africa** and will be coupled with a **Covid-19** vaccination program once a vaccine becomes available.

Global Identity Verification

The push to implement **biometrics as part of national ID registration systems** has been ongoing for many years on the continent and has become a **highly politicized issue** in several African countries. Opposition to similar projects in Africa often revolves around the costs surrounding them, such as the biometric voter management system that the Electoral Commission of **Ghana** has been trying to implement ahead of their 2020 general election in December.

Masking ulterior motives: **Trust Stamp's biometric identity system**, largely funded by **Mastercard's massive investment** in the company in February, utilizes a technology it calls Evergreen Hash that creates an AI-generated "3D mask" based on a single photo of a person's face, palm or fingerprint. Once this "mask" is created, much of the original data is discarded and **encryption keys are created in place of a person's name or other more traditional identifiers.**

"Only a small percentage of the data that originally existed is in the hash," **Trust Stamp CEO Gareth Genner has stated.** "What you have is something safer for storing because it can't be used to directly identify you. No one would recognize you in this huge jumble of numbers." The result, according to Genner, is an **"irreversible non-personally identifiable information"** system that "protects privacy, reduces potential for misuse and allows effective inclusion when there is no other form of legal

record."

have revealed an interest in their utilization of **Trust Stamp's** technology to provide identification for individuals on parole "without making them pay for pricey ankle bracelets that monitor their every move," as **Trust Stamp's platform** would ostensibly provide that same function but in a "touchless" and less expensive manner.

Trust Stamp's interest in providing its technology to both **COVID-19** response and to law enforcement is part of a growing trend where numerous companies providing digital solutions to **COVID-19** also offer the same solutions to prison systems and law enforcement for the **purposes of surveillance** and "**predictive policing**".

This not just **predictive policing** but **Today's Globalist Culling** (killing).

For instance, contact tracing software originally introduced as part of the **COVID-19** response has since been **used by police departments** across the U.S. **to track protesters** during the country's recent bouts of protests and civil unrest. Similarly, **a controversial Israeli tech firm** currently being used in Rhode Island offers AI-powered predictive analytic to identify likely future **COVID-19** hotspots and individuals likely to contract **COVID-19** in the future, while also offering governments the ability to predict future locations of and participants in riots and civil unrest.

What is perhaps most alarming about this new "**Wellness Pass**" initiative, is that it links these "**dual use**" digital solutions to **cashless payment solutions that could soon become mandated** as anything over than touchless, cashless, methods of payment

have been treated as potential modes for contagion by **GAVI-aligned groups like the World Health Organization**, among others, since the pandemic was first declared earlier this year.

Racism under the guise of science is making a comeback with claims that **AfricanAmericans have a genetic predisposition to COVID-19.**
